

# iEMON

Fixed-Term EMON Staking and IGO Allocations

The background is a dark space scene filled with various celestial objects. There are several yellow stars of different sizes, a grey moon, a purple planet with a ring, a blue planet, and a blue planet with a ring. A large, colorful rainbow creature with pink spikes is visible at the bottom. The title "What is iEMON?" is centered in white text.

# What is iEMON?

iEMON is similar to "IGO credits" from the EMON staking pool. After this update, iEMON will determine the maximum EMON commit limit in the IGO public sales. For example, if you have 200 iEMON, you will be able to commit 200 EMON in any upcoming IGO public sales.

iEMON is NOT a new token, it is a numerical metric being used by the IGO system.

# How is iEMON calculated?

The number of iEMON you have is based on the number of EMON staked in the fixed-term EMON staking pool and the total staking duration of your current fixed-term staking position. iEMON works based on a staking duration threshold for all iEMON users.

If your staking duration is above the threshold, the number of iEMON you have is equal to the number of the EMON in your staking position. If your staking duration is below the threshold, the number of iEMON you have will be linearly decreased and adjusted. If your staking position is ended, the number of iEMON you have is 0.

For example, if the threshold is 20 weeks:

Your current fixed-term staking position has a duration of 25 weeks and 200 staked EMON. Then the number of iEMON you have is 200.

STAKING DURATION  $\geq$  THRESHOLD

Your current fixed-term staking position has a duration of 10 weeks and 200 staked EMON. Then the number of iEMON you have equals  $200 \times (10 \div 20) = 100$ .

STAKING DURATION  $<$  THRESHOLD

Your current fixed-term staking position has a duration of 2 weeks and 200 staked EMON. Then the number of iEMON you have equals  $200 \times (2 \div 20) = 20$ .

iEMON = LOCKED EMON AMOUNT

Your current fixed-term staking position has a duration of 2 weeks and 200 staked EMON. But the position is ended. Then the number of iEMON you have is 0.

iEMON = LOCKED EMON AMOUNT  $\times$  (YOUR STAKING DURATION/THRESHOLD)

DETAILS

# How to Check the Number of iEMON I have?

You can check the number of iEMON you have in the IGO page [here](#).

# How to Increase the Number of iEMON I have?

You can increase the number of iEMON you have by:

- Adding more EMON to your fixed-term staking position in the EMON Galaxies.
- Extend your fixed-term staking durations if your current durations is shorter than the threshold.

You can preview the number of iEMON generated from your staking position when adjusting or initializing the fixed-staking.

## LOCK OVERVIEW

## LOCK OVERVIEW

EMON TO BE LOCKED 1027.46

iEMON 410.98

86.54%

The number of iEMON equals the locked staking amount if the staking duration is longer than 35 weeks. If the staking duration is less than 35 weeks, it will linearly decrease based on the staking duration.

25 weeks

# What is the Threshold for iEMON Calculations?

Between each IGOs, the kitchen will optimize the threshold based on the average staking duration of the fixed-term staking EMON pool. The adjustment will be published on all social channels.

You can check the current threshold for iEMON calculations by hovering or tapping the underlined iEMON text in the EMON Galaxies window.
